SOHAN PRAJAPATI

Pursuing Bachelor of Engineering in IT department in SVIT, Vasad. Currently I am learning about data structure and database management and I start Android and IOS app Development

Key skills:- leadership support

PROFESSIONAL PROJECTS

INDIAN TOURISM
Sunhacks-2022,Nashik

The goal is to create a website that features the history of heritage places in India to help users plan their visits.The website will be designed to provide users with an immersive and engaging experience, complete with high-quality images, videos, and interactive maps. This will allow users to explore and learn about these heritage sites before making travel plans.

HOSPITAL MANAGEMENT

A hospital service website is a digital platform that provides information and resources for patients, physicians, and other healthcare professionals. The website can serve as a central hub for a hospital or healthcare system, allowing users to access information about the facility, its services, and its staff.

MY NOTES APPLICATION.
Hacksvit-2021, svit,vasad

The goal of application is to create my personal note app. Using Python and tk.inter . it is totally based on pymysql for database Management. This app is boost my coding knowledge in python Also I start android and IOS application using flutter. It's my first app in my college life.
